

I have been listening and supporting AIR 1 for two years and this radio station is a blessing in our area. I mainly listen to two radio stations, AIR 1 and NPR. Both these stations would be adversely affected by LPFM broadcasters. And because of the distance between towns in this area, LPFM would be in-effective in covering area leaving patches without radio coverage. This would lead to not listening to the radio and only my MP3 player or getting a satellite radio. AIR 1 got me listening to the radio again and I know the same is true for others. Losing radio stations would cause me and maybe other to stop listening to the radio. This would not be a benefit to the public. Please do not put the LPRM stations in priority over stations like AIR 1!
